-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Drawings

The drawings are objected to because of the following informalities:

Figures 1-5 are objected to because every line, number, and letter are not durable, clean, black, sufficiently dense and dark, and uniformly thick and well-defined.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities:

On page 3, line 6, change "drawing" to --- drawings ---.

On page 3, lines 17, 18, 22 and 27, reference numeral "1" is used to identify a high-performance printer, however, reference numeral "1" does not appear to be shown in any of the figures.

On page 3, line 27, reference numeral "17" is used to identify two output channels, however, only one output channel is shown in the figures.

On page 4, lines 2, 15 and 21, reference numeral "1" is used to identify a high-performance printer, however, reference numeral "1" does not appear to be shown in any of the figures.

On page 4, line 25, change "fixing devices, etc" to --- fixing devices 4, 5 and the like ---.

On page 4, line 26, change "13" to --- 6 ---.

On page 5, line 20, after "computer" insert --- 30 ---.

On page 6, line 18, reference numeral "1" is used to identify a printer, however, reference numeral "1" does not appear to be shown in any of the figures.

On page 7, line 3, change "the feed system B must" to --- the feed system D must ---.

On page 8, line 1, change "etc" to --- and the like ---.

Appropriate correction is required.

Claim Objections

Claim 1 is objected to because of the following informalities:

Claim 1, line 1, change "copiers" to --- copier ---.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 5-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Haines et al. Referring to Figures 3-5, methods and systems for monitoring consumable item lifetimes for peripheral units are shown. The systems include: a lifetime monitoring mechanism operably associated with an image forming apparatus and configured to monitor the lifetime of an image forming apparatus consumable that is associated with operation of the image forming apparatus; a user manipulable threshold defining mechanism operably coupled with the lifetime monitoring mechanism and configured to receive user input and responsive to the user input, define a threshold value for the lifetime monitoring mechanism; and a warning generator configured to generate a notification when the consumable that is associated with operation of the image forming apparatus reaches the threshold value.

Allowable Subject Matter

Claims 3 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Relevant Prior Art

The following prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Carling et al disclose a system capable of personalization of operator replacement component life prediction based on replaceable component life history.
